APACHE SLING & FRIENDS TECH MEETUP
BERLIN, 22-24 SEPTEMBER 2014

Netbeans – Sightly Extension
Alex Muthmann – pro!vision GmbH

Netbeans Sightly Extension

- brackets extension for AEM front-end developers
- But what about the back-end?
- => we need extensions too!

Current Features

- data-sly-*
- currentPage.*
- wcmmode.*
- Lookup of classes in the current project

Wishlist

- Filter out all classes not annotated as @Model

- Add some more build-in classes (request, …)

- More context-awareness

- Show getter-methods after data-sly-use

Download

- Note: will be moved to another (better place)
- Github:

https://github.com/deveth0/wcm-io/tree/netbeansSightly/tooling/netbeans/sightlyExtension

- Binary:

https://github.com/deveth0/wcm-io/tree/netbeansSightly/tooling/netbeans/sightlyExtension/binary
