

adaptTo()

APACHE SLING & FRIENDS TECH MEETUP
10-12 SEPTEMBER 2018

Bootstrapping website development with Sling Models
and HTL using Core Components

Vlad Băilescu*, Burkhard Pauli, Richard Hand, Radu Cotescu

adaptTo()

WHAT

Website development

- Shorter time to value
- Build websites faster

adaptTo()

WHY

AEM Project

adaptTo()

HOW

Core Components: Technology

- HTL markup
 - Clean, HTML-based templating language
 - Use-objects
 - Sling Models
 - POJOs
 - Javascript
- Open source
 - <https://github.com/Adobe-Marketing-Cloud/htl-spec>
 - <https://github.com/apache/sling/tree/trunk/bundles/scripting/sightly>
- Standardized BEM-style classes: cmp-breadcrumb__item--active

*BEM = Block Element Modifier

Core Components: Tested

- Unit tests
 - Coverage > 80%
 - <https://codecov.io/gh/Adobe-Marketing-Cloud/aem-core-wcm-components>
- UI tests
 - Hobbes JS
 - <https://docs.adobe.com/docs/en/aem/6-3/develop/ref/test-api/index.html>
 - <https://github.com/Adobe-Marketing-Cloud/aem-core-wcm-components/tree/master/testing/it/ui-js>
 - Selenium

Core Components: Versatile

- Configurable
 - Edit Options
 - Content Policies
- Style System
 - Predefined classes
- Extensible

Core Components: Extensible

- Proxy pattern
 - Core components are hidden by default
 - Create proxy components - `sling:resourceSuperType`
- Customize
 - HTL script
 - Sling Models implementation
 - Dialog tabs
- Composition
 - Include components using `data-sly-resource`
 - Reuse Sling Model implementation

adaptTo()

NO, REALLY, HOW?

WKND Tutorial

- Fictional online magazine and blog
- Mockup to fully functional website
- Available on GitHub and Adobe HelpX

Steps

1. Setup
2. Base template and page, components
3. Styling and layout
4. Navigation and Search
5. Custom components

adaptTo()

PLAY TIME!!!

1. Setup - Requirements

- Java 8
- Maven 3.5+
- AEM 6.4 (running, clean – no sample content)
- IDE & tools
 - Eclipse
 - IDEA
 - repo

1. Setup – Generate project

- Create project with Maven AEM Project Archetype
- Build
- Install on local AEM instance
- Review

1.1 Create project with Maven AEM Project Archetype

```
mvn org.apache.maven.plugins:maven-archetype-plugin:2.4:generate \
-DarchetypeGroupId=com.adobe.granite.archetypes \
-DarchetypeArtifactId=aem-project-archetype \
-DarchetypeVersion=13 \
-DarchetypeCatalog=https://repo.adobe.com/nexus/content/groups/public/
```

1.1 Create project with Maven AEM Project Archetype

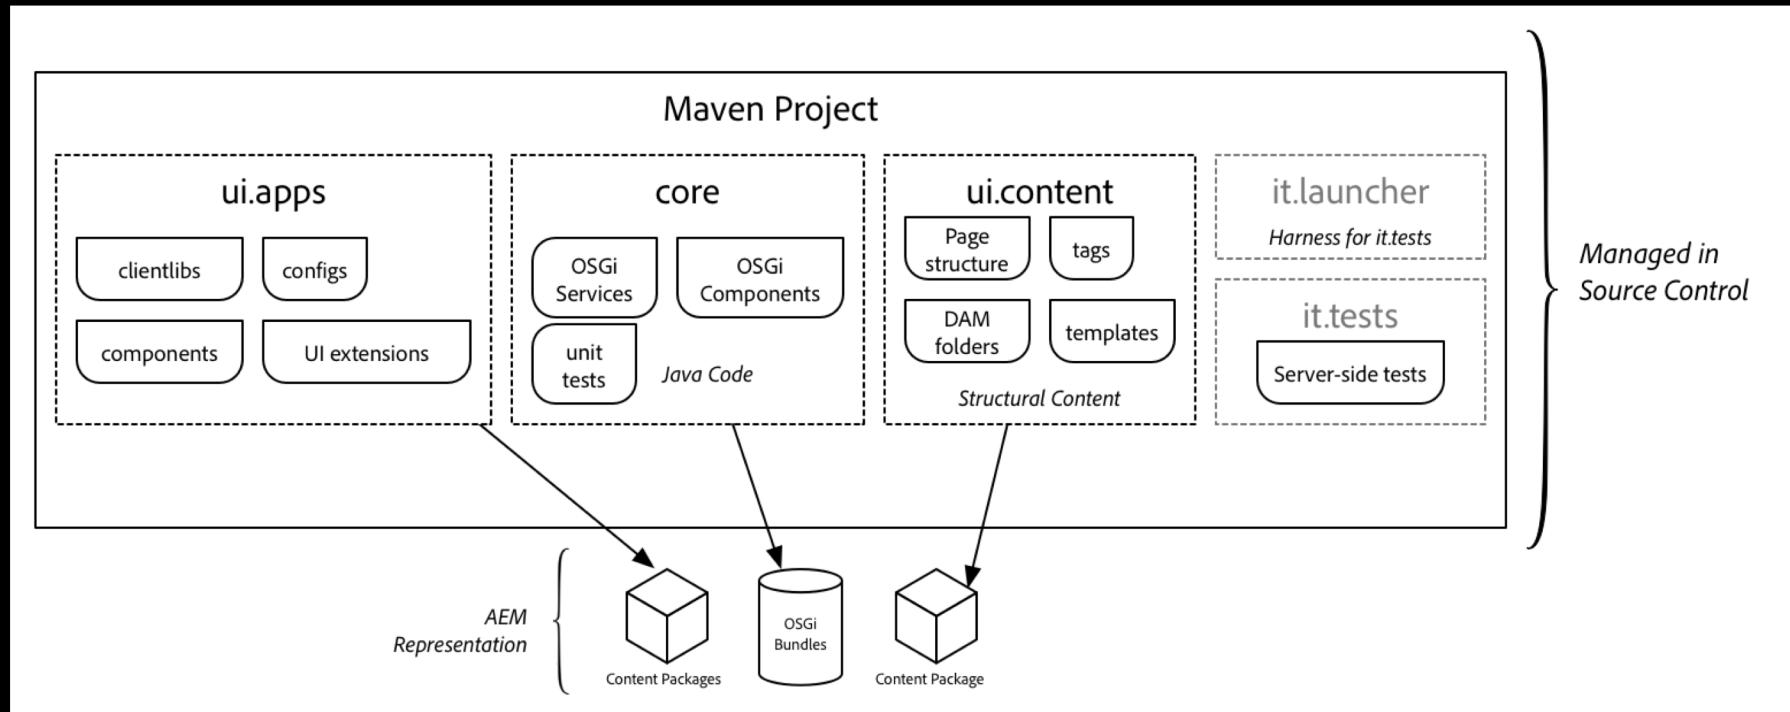

- groupId: com.adobe.aem.guides
- artifactId: aem-guides-wknd
- version: 0.0.1-SNAPSHOT
- package: com.adobe.aem.guides.wknd
- appsFolderName: wknd
- artifactName: WKND Sites Project
- componentGroupName: WKND.Content
- confFolderName: wknd
- contentFolderName: wknd
- cssId: wknd
- packageGroup: aem-guides/wknd
- siteName: WKND Site

1.2 Build project and install on local running AEM

```
cd aem-guides-wknd  
mvn -PautoInstallPackage clean install
```

1.3 Review

1.3 Review

- Project structure
 - aem-guides-wknd/ui.apps/pom.xml – Includes Core Components
- Package Manager - <http://localhost:4502/crx/packmgr/index.jsp>
- Bundles Console - <http://localhost:4502/system/console/bundles>
- Sites Console - <http://localhost:4502/sites.html>
- Sites Editor - <http://localhost:4502/editor.html/content/wknd/en.html>

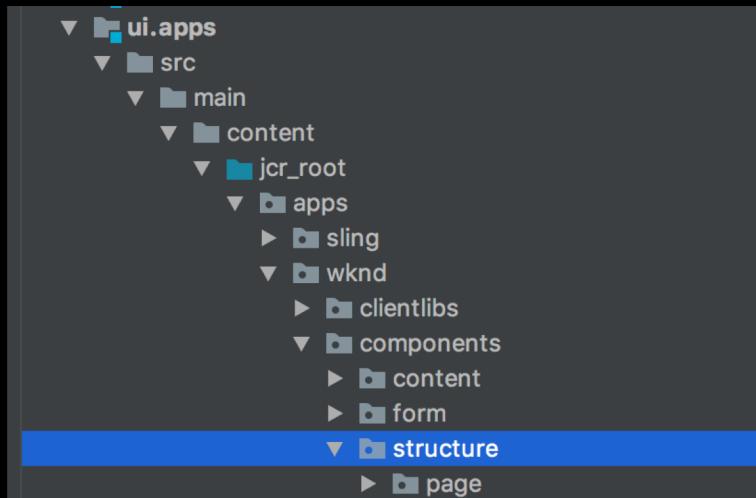

2. Base template and components

- Inspect structure
- Basic components
- Checkout sample project & install
- Inspect templates

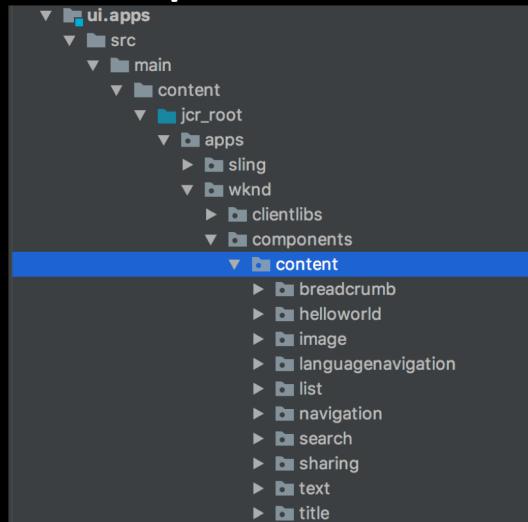

2.1 Inspect structure

- ui.apps
 - /apps/wknd/components/structure

2.2 Basic components

- **Ui.apps**
 - **/apps/wknd/components/content**

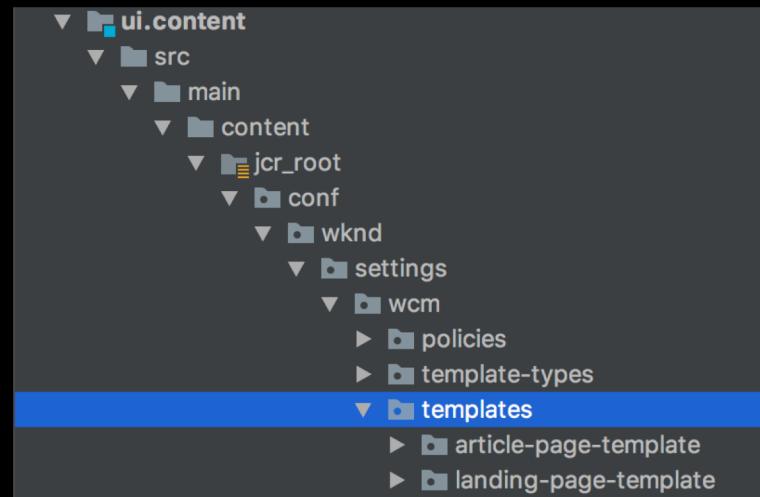

2.3 Checkout sample project & install

- Checkout project from
<https://github.com/Adobe-Marketing-Cloud/aem-guides-wknd>
- Install

```
mvn -PautoInstallPackage clean install
```

2.4 Inspect templates

- ui.content
 - /conf/wknd/settings/wcm/templates

- Tools > General > Templates

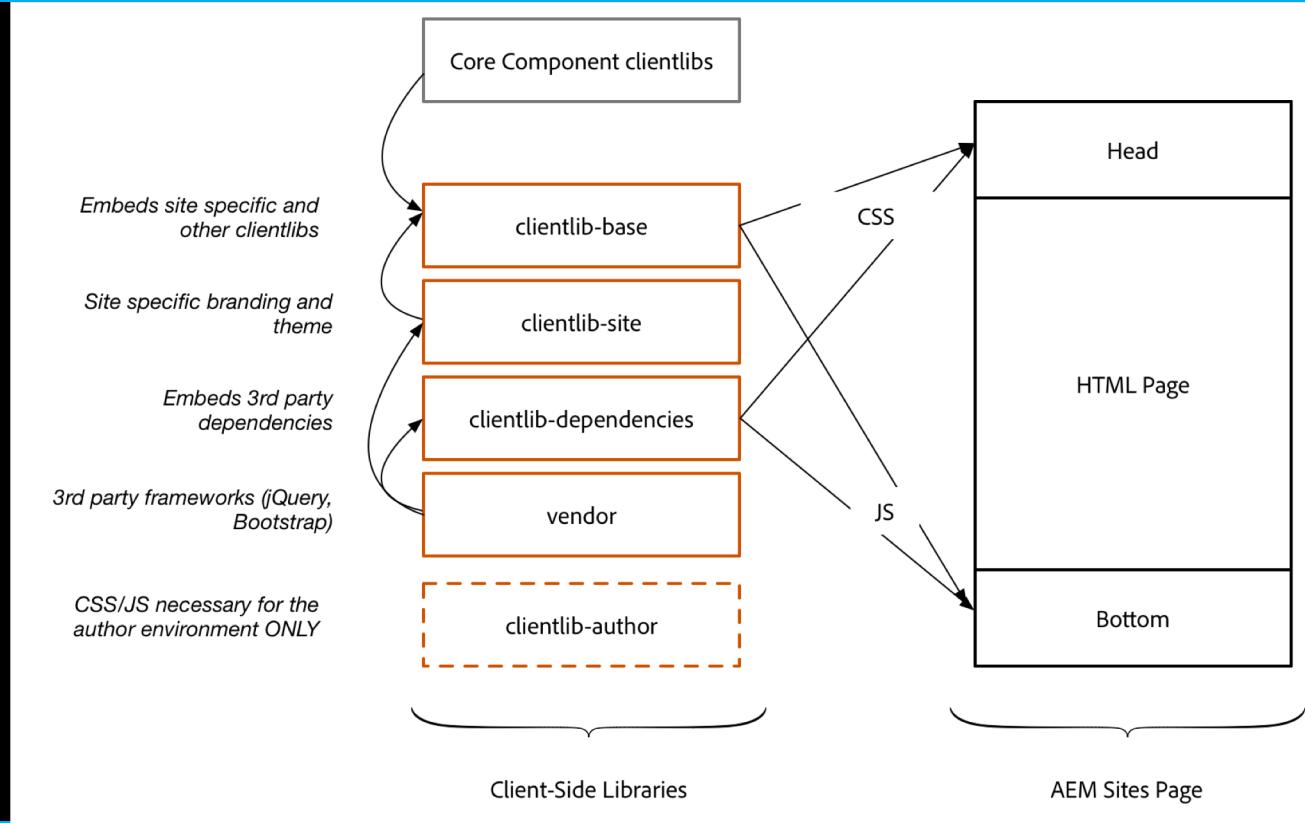

- <http://localhost:4502/libs/wcm/core/content/sites/templates.html/conf/wknd/settings/wcm/templates/>

3. Styling and layout

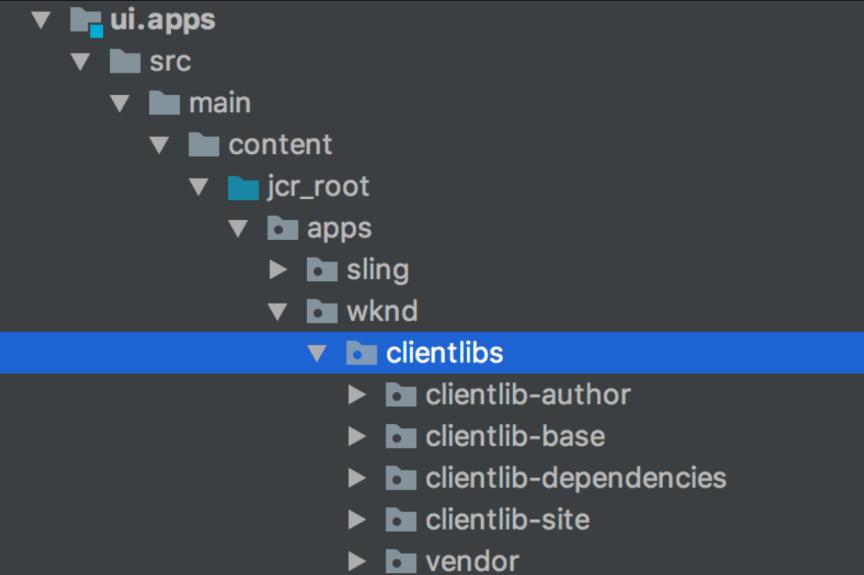

- Client libraries and assets
- Responsive grid and Layout Mode
- Style System

3.1 Client libraries

3.1 Client libraries

- ui.apps
 - /apps/wknd/clientlibs

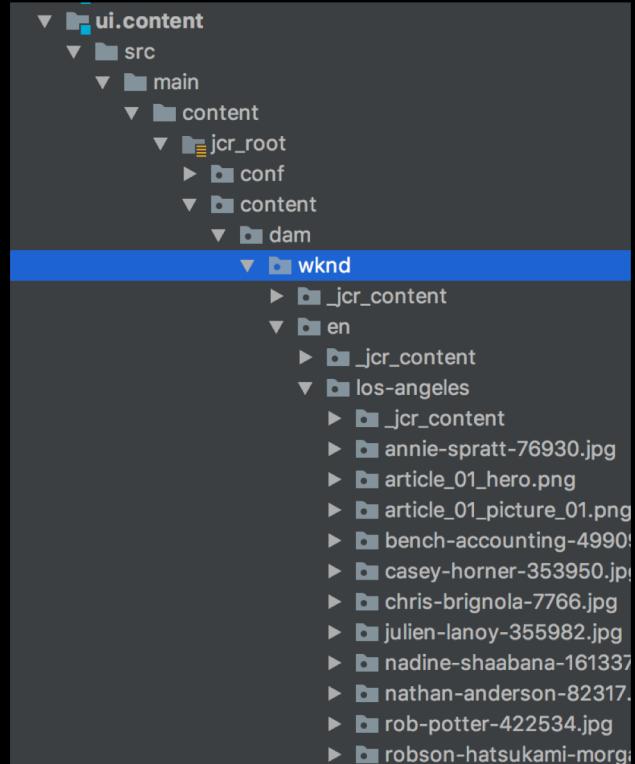

- Included via
 - /apps/wknd/components/structure/page/custom[footer|header]libs.html

3.2 Assets

- ui.content
 - /content/dam/wknd
- Assets console
 - <http://localhost:4502/assets.html>

3.3 Responsive grid & mobile emulator

donec. Enim lobortis scelerisque fermentum dui faucibus in ornare quam viverra. Vitae proin sagittis nisl rhoncus mattis. Pellentesque eu tincidunt tortor aliquam nulla facilisi cras fermentum. Adipiscing diam donec adipiscing tristique risus nec feugiat in fermentum.

Drag components here

gravida neque convallis a cras semper auctor. A erat nam at lectus urna duis. Commodo odio aenean sed adipiscing diam. Tellus cras adipiscing enim eu turpis egestas pretium aenean pharetra. Vitae semper quis lectus nulla. Tincidunt dui ut ornare lectus sit. Commodo sed egestas egestas fringilla phasellus faucibus scelerisque eleifend donec.

WKND First Article

Hello World!

Lore ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Lacus sed turpis tincidunt id aliquet. Tellus in hac habitasse platea. Sollicitudin aliquam

Sit amet aliquam id diam maecenas ultricies. Gravida arcu ac tortor dignissim convallis aenean et tortor at. Massa sapien faucibus et molestie ac feugiat sed lectus vestibulum. Suscipit adipiscing bibendum est

3.4 Style System

Policy

First choose a policy to apply. Policies can be shared across templates

Select policy

WKND Title - Article

+

Policy Title *

WKND Title - Article

Policy Description

Add a description

Other templates also using the selected policy

There is no item.

Properties

Then adjust the settings of the selected policy to configure the component

Sizes Styles

Default CSS Classes

Allowed Styles

Group Name Styles can be combined

Styles

Underline

cmp-title--underline

Add

Add

3.4 Style System

The screenshot shows a rich text editor interface with a dark theme. At the top, there is a toolbar with various icons: a pencil, a text style dropdown, a font dropdown, a bold/italic button, a list button, a link button, a plus sign, a trash can, a rectangle selection tool, a square selection tool, a grid selection tool, a text alignment tool, and a double arrow tool. Below the toolbar, the title "First Article" is displayed in a large, bold, serif font. The main content area contains two paragraphs of placeholder text in a smaller, sans-serif font. The first paragraph reads: "Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quisque sagittis metus at justo rhoncus, id elementum arcu finibus. Curabitur condimentum justo sodales neque tempus, vitae faucibus justo laoreet. Maecenas tempus nisi eget scelerisque". The second paragraph continues: "Nullam eget interdum felis efficitur, suscipit tortor eu dapibus so accumsan ligula leo u".

First Article

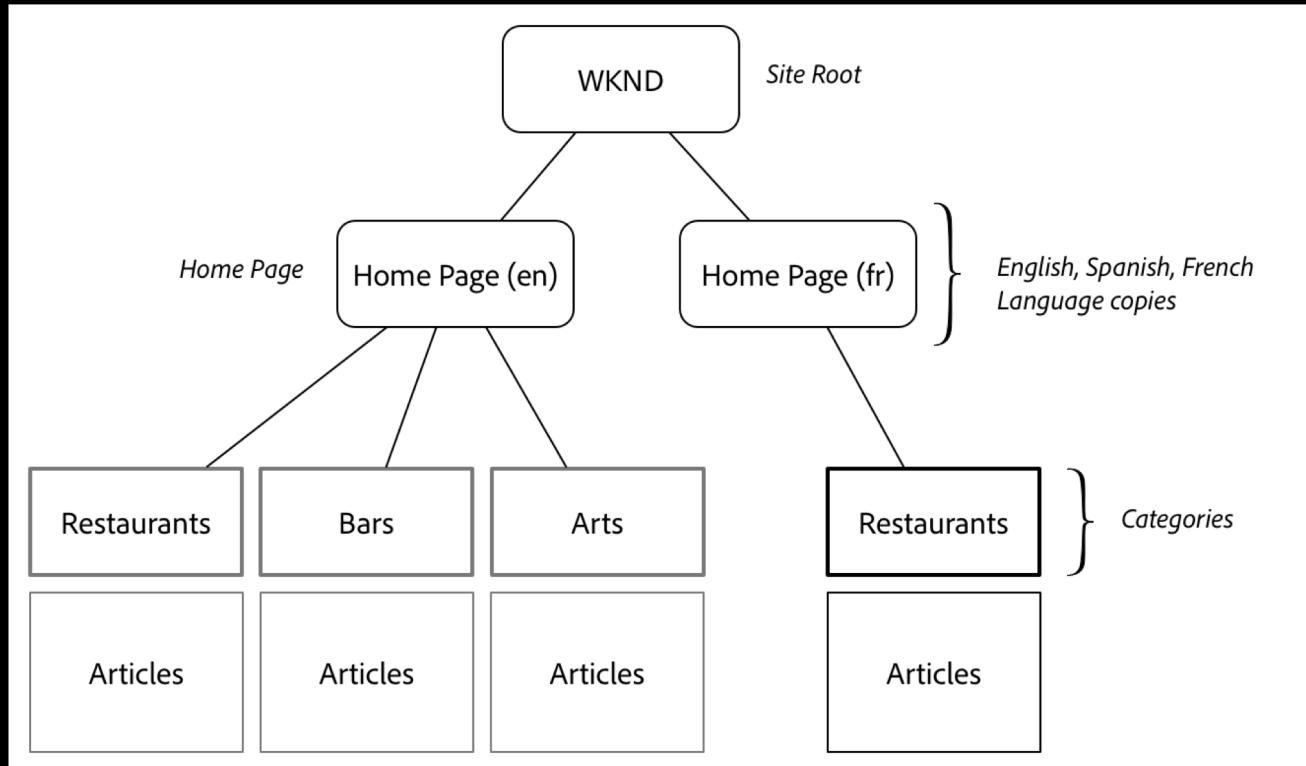

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quisque sagittis metus at justo rhoncus, id elementum arcu finibus. Curabitur condimentum justo sodales neque tempus, vitae faucibus justo laoreet. Maecenas tempus nisi eget scelerisque Nullam eget interdum felis efficitur, suscipit tortor eu dapibus so accumsan ligula leo u

4. Navigation and Search

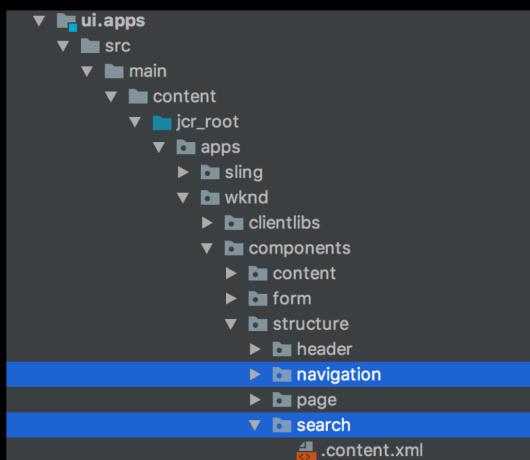

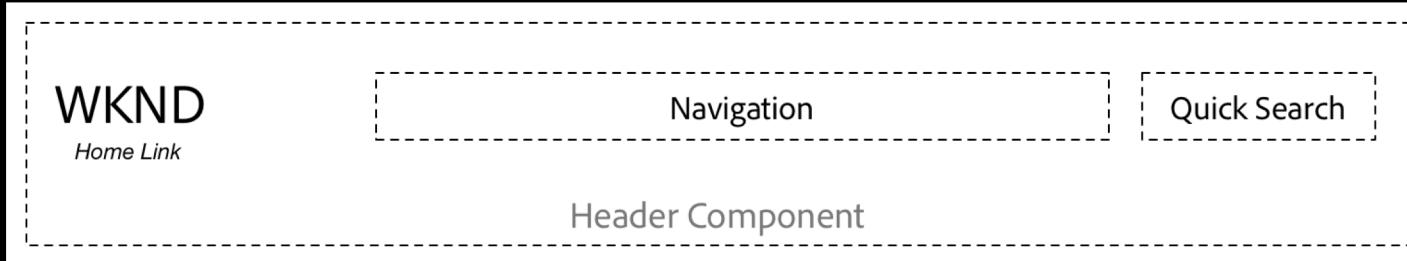

- Site structure
- Navigation
- Search

4.1 Site structure

4.2 Navigation & Search

5. Custom Components

- Custom components
- HTL template
- Sling Model
- (Optional) Customize the Sling Model of an existing component

5. Custom Components

- Custom components
 - HelloWorld
 - Card
- HTL template
- Sling Model
- Edit dialog

5.1 HelloWorld

HTML template

```
<p data-sly-test="${properties.text}">Text  
property: ${properties.text}</p>  
  
<pre data-sly-  
use.hello="com.adobe.aem.guides.wknd.core.models  
.HelloWorldModel">  
HelloWorldModel says:  
${hello.message}  
</pre>
```

Sling Model

```
@Model(adaptables=Resource.class)  
public class HelloWorldModel {  
  
    @Inject  
    private SlingSettingsService settings;  
  
    @Inject @Named("sling:resourceType") @Default(values="No resourceType")  
    protected String resourceType;  
  
    private String message;  
  
    @PostConstruct  
    protected void init() {  
        message = "\tHello World!\n";  
        message += "\tThis is instance: " + settings.getSlingId() + "\n";  
        message += "\tResource type is: " + resourceType + "\n";  
    }  
  
    public String getMessage() {  
        return message;  
    }  
}
```

5.1 Card

- **HTL template** - /apps/wknd/components/content/card/card.html
- **Sling Model**
 - **Interface** - com.adobe.aem.guides.wknd.core.components.Card
 - **Implementation** - com.adobe.aem.guides.wknd.core.components.impl.CardImpl
- **Edit dialog**
- **Design dialog – Style System support**

Task #1 – Setup Teaser and add Styles

- Update the core components version to 2.1.0
- Create a proxy teaser component
- Add custom stylesheet and variations for the teaser component

Task #2 – Create custom teaser

- Create a custom teaser sling model which delegates to the v1 teaser component
- Extend the sling model to add custom behavior (e.g. date of the linked page)
- Add a custom HTL output

Thank You!
