APACHE SLING & FRIENDS TECH MEETUP
10-12 SEPTEMBER 2018
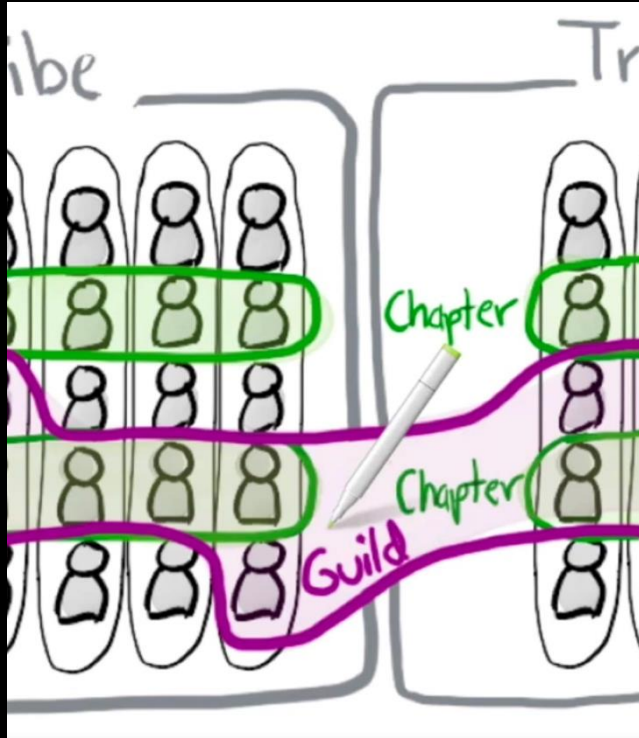

Sling community citizenship
N. Peltier, Adobe

- Managers are not architects
- Our daily activity is not that complicated

Culture and principles are tiring

- « culture » seeking is narrowed to one company
- How much time is spent understanding and explaining vocabulary?

About citizenship

- Defined against a community
- Rights…and duties

What duties?

Transmitting
- Code
- Information (question, answer, JIRA, announce, proposal, …)

To a community

When to contribute?

Generalize → Research → Dare

How to contribute?

- Github for code, with PR, linked with JIRA

- JIRA ticket linking to discussion or documentation

- Wiki that documents, or sling documentation

Stable URLs!

Apache Sling
users@sling.apache.org / issues.apache.org/jira

Company

Project

What about efficiency?

For your project

- Big differenciator when geo distributed,
- Failures and mistakes are found faster,
- Others solve your problems!

- You are recognised by the community as individual

- You learn others coding skills,

- You learn communication skills,

- Others guide you, inspire you, contradict you

- You are recognised by the community as individual

- You learn others coding skills,

- You learn communication skills,

- Others guide you, inspire you, contradict you
